Answer the following questions in your own words. Do NOT simply cut and paste the information from the slides. You will receive a score of 0 if you copy the prose from the slides.

Question 1

2 pts

Why would RAD not work on a project with a traditional customer-supplier relationship?

[HTML Editor](#)

B *I* U **A** ▼ **A** ▼ *I* 12pt ▼ Paragraph

RAD would not work on a project with a traditional customer-supplier relationship because it needs more frequent communication compare to used in traditional. Client can make changes or modify the features which they want to add or need into the final product, during the execution or construction phase of the RAD process. The client are still involved with the development team in the first two pages of the RAD. while the traditional team should not have that much type of customer-supplier relationship.

Question 2

2 pts

Describe two of the principles of DSDM that are consistent with the Agile Manifesto.

[HTML Editor](#)

B *I* U **A** ▼ **A** ▼ *I*_x x^2 x_2 \sqrt{x} 12pt ▼ Para

Active user involvement: In agile methods, customer involvement is very continuous and important. It creates a lots of opportunity for client, using which client to be able to make frequent changes and modify the features according to their requirements. As similar as DSDM is also works on customer involvement while team is working on their repeatable phases.

Frequent and incremental delivery: DSDM and agile manifesto, both the methods have a limited time period during which they have to complete the task and make a delivery to the client at the end of the time period whether the task is completed or not. Hence, for the both method frequent delivery opens the door for the better feedback and make final product which is very near to the client's imagined product.

Question 3

2 pts

What is produced by the Feasibility Study of DSDM?

[HTML Editor](#)

B *I* U **A** ▼ **A** ▼ *I*_x x^2 x_2 \sqrt{x} 12pt ▼ Para

The feasibility report is produced by the feasibility study. This report is used to determine the flow according to which project will be done also execution of this project will be worth it or not. Determination of this is done through a short business case, in the creation of the project, DSDM is suitable or not and requirements and features of the project are analyzed very precisely and deeply. Add to it, the feasibility study consist many more models which includes a described and detailed schedule of the project with budget criteria, as well as it gives outline of the risk that will come with taking on the project.

Question 4

2 pts

According to Clifton, under what circumstances is DSDM most likely to succeed?
What are the criteria?

[HTML Editor](#) 

B *I* U A ▼ A ▼ *I*_x      x^2 x_z  
     \sqrt{x}    12pt ▼ Para

According to Clifton, Criteria are:

- Each member of the team are able to meet easily and without any issue.
- Each team must be able to work in group together and be supportive.
- Each team members should be supportive and give a commitment about the management of full project.

Question 5

2 pts

Describe the MoSCoW rules for requirements. How are they used in DSDM?

[HTML Editor](#) 

B *I* U A ▼ A ▼ I_x      x^2 x_z      \sqrt{x}    12pt ▼ Paragraph

The MoSCoW technique is used for identify the priority of any requirements with the help of client.

The MoSCoW rules for requirements are divided into four key phrases which are used for describe the requirements or features:

1. Must have
2. Should have
3. Could have
4. Want to have

In DSDM, the MoSCoW rules are used as a technique to prioritize the requirements or feature. For each iteration team can take so many requirements, so 60% of their time will be focused on Must have, 20% of their time focused on Should have, 20% of their time will be focused on Could have and remaining time will be focused on want to have.
