Score for this quiz: **10** out of 10

Submitted Sep 21 at 9:50pm

This attempt took 3,001 minutes.

### Question 1

**2 / 2 pts**

Why are features "locked" during a sprint?

Your Answer:

The features are locked during a sprint so that members of development team easily focus on their current work and do it in proper way in given time. If features are not locked then it will distract the developer's mind which is not good. Hence, to eliminate confusion between developer team, features are kept locked.

### Question 2

**2 / 2 pts**

Describe who attends and what happens at the Daily Standup/Scrum meeting

Your Answer:

Scrum master and development team are main the part of Daily Stand up/Scrum meeting, while product owner attend this meeting once in a while.

The Daily Stand up meeting facilitate by scrum master but this meeting will run by development team. All member of development team will discuss on what did they do and what will they do to achieve a sprint goal and is there any interrupts which prevent them to complete the task. In short, Daily scrum meeting is a short time meeting which is known as inspect and adapt activity.

### Question 3

2 / 2 pts

Describe the DEEP acronym for identifying appropriate Product Backlog Items.

Your Answer:

DEEP acronym is used by product owner or manager to handle product backlog and user stories. Obviously tasks which have higher priority performed in next sprint.

D - Detailed appropriately: it is stands for whatever data in product backlog is more contextual and large so that development team can understand and discuss on it.

E - Emergent: due to product backlog, update is take place for stories and items. for example add new stories or item or delete it due to new information is added.

E - Estimated: the development team have to make sure that effort behind each story should roughly estimated with approval of a team. items at the top get high precise estimate compare to items at bottom.

P - Prioritized: As the name suggests give the priority or rank to the items which are on the backlog according to their need or value. obviously, item which have a higher priority is on top.

**Question 4****2 / 2 pts**

What is the difference between defined and empirical processes?

Your Answer:

<b>Defined Process</b>	<b>Empirical Process</b>
In defined process requirements are defined earlier.	In Empirical process requirements are not completely defined.
Every effort behind the task is completely understood	Difficult to understand.
Complicated process	Complex process
Each task is assigned by proper instruction	Knowledge about the best approach is incomplete
For a well defined set of inputs, same output generated every time.	Output is unexpected and unpredictable.
Used by Plan driven approach	Used by Agile approach

**Question 5****2 / 2 pts**

Describe the three steps of grooming the Product Backlog and who performs those steps.

Your Answer:

- 1. Creating and Refining:** This step remove the stories from the backlog which are not needed and create new story according to requirement. This is suggest by any one of the team.
- 2. Prioritizing items** In this step the relative priority of the items is re-assessed. This task is done by product owner.
- 3. Estimating items** Each story is estimated according to updated information and splitting user stories into small task. This is done by development team.

**Question 6****0 / 0 pts**

"I pledge on my honor that I have not given or received any unauthorized assistance on this assignment/examination. I further pledge that I have not copied any material from a book, article, the Internet or any other source except where I have expressly cited the source."
